

## Prophecy Vol 2 – GEOSynths.

Thanks for purchasing Prophecy Vol 2 for the Sequential Prophet 5 & 10 Keyboards and Modules. I hope you enjoyed Vol 1, which had some more traditional types of Sounds as well as some more 'adventurous' Sounds too :) While there are a few 'normal' Patches in this Bank, I have tried to dig a little more with Vol 2 for different Prophet Sounds.

As you know there are no FX on the Prophet 5/10 and the output is Mono and while that's fine, it does mean we have to try and find a solution to make it Stereo, Add Modulation FX and Time based FX such as Reverb or Delay.

With Vol 1, I decided to try and find a no or low cost Solution to over this, hopefully in one Plug-In and...Failed! So I looked for a long time...Longer than you'd think and installed demo after demo, trying to find a Plugin that had Chorus, Delay and Reverb in one, so I could store a single FX Preset, to go with the rest on the Prophet...Alas, the ones I found were either very expensive, didn't sound any good or were too in-depth.

So I came up with the idea to use a "Chorus" to effectively turn the Prophet into Stereo and then add a separate Delay/Reverb. They are used as "Inserts" in your DAW's channel, with Chorus first, then Delay after. The Volume levels have already been sorted out.

With Vol 1 I decided upon Arturia's Jun 6 Chorus, which was free at the time and Valhalla Supermassive. This time I have used:

Blue Cat Audio - Chorus

[https://www.bluecataudio.com/Products/Product\\_Chorus/](https://www.bluecataudio.com/Products/Product_Chorus/)

Valhalla Supermassive for the Delay/Reverb (V2.0)

<https://valhalladsp.com/shop/reverb/valhalla-supermassive>

Both have downloads for Mac/PC - Please refer to their Instructions for install.

## Presets

I have created 80 Patches for the P5/10 and these are over 2 “Groups”. The P5/10 doesn’t use “Banks” as such, just 5 Groups of 40 Presets each, so you can think of these “Groups” as mini Banks.

I made 2 Groups of 40 Patches, starting at Group 1 - Patch 111 for Patches 1 to 40, then Group 2 for Patches 41 to 80.

I have also create corresponding FX presets to go with each Patch, so for instance if you wanted to play Patch Number 111 “In Time GEO”, you would find the same Preset Name in the Blue Cat Audio Chorus Chorus and Valhalla Supermassive.

## Observations.

Some Patches will sound different in terms of Volume as there is no way (I found) to change the Presets overall Volume, unless I messed with the Amp Envelope.

Sometimes the soft attack of a sound will get cut off and there might be a “click”. I used the Triangle Wave mostly for the LFO as the other 2 shapes tend to cause clicks, but that’s the same on the OB6 and Prophet 6.

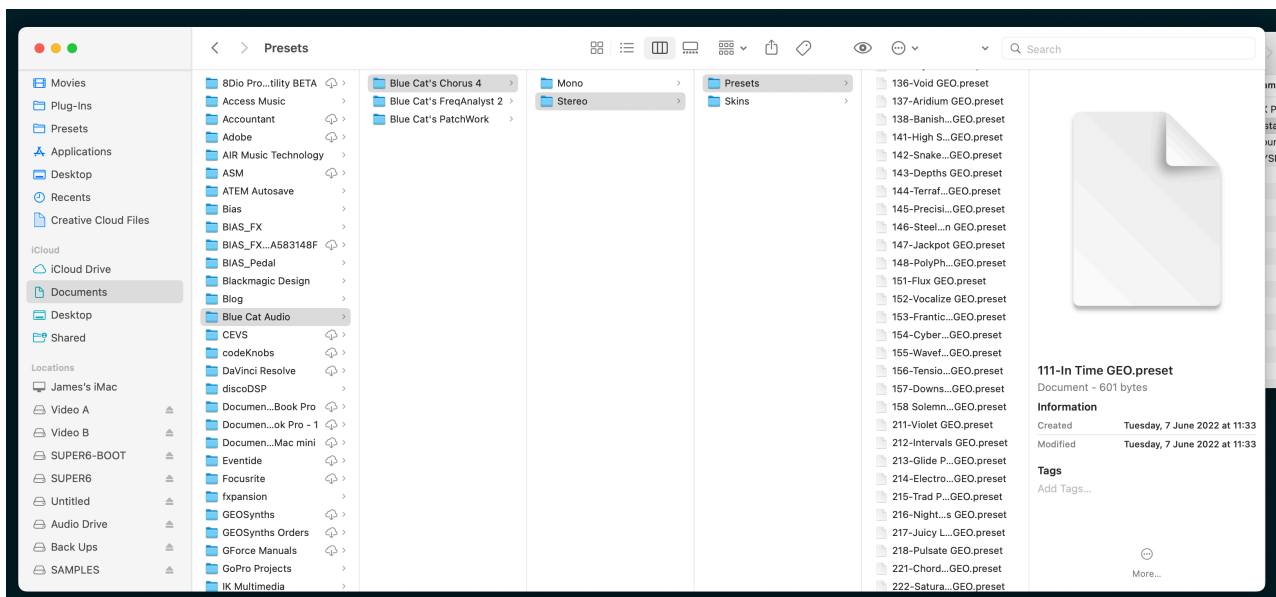

## Installation

I have made an installation Video which is easier to follow than reading about it, however here are the instructions.

In the download I have included the following Data as:

1. SYSEX Groups (Think of them as Banks) - There is a folder with Groups 1 and 2 in, you will need to send these to the P5/10 one at a time.
  2. SYSEX Copies - Now, you may already have something in User Group's 1 and 2, so I have duplicated the Groups, so you can load them into which ever free Group you have left. So, open the folder "2. Copies of each of the 5 User Groups" and say you wanted to load the first 40 Patches in your User Group 3 location, which will mean the first Patch will start at "311"
- Then just find the file "Prophecy Vol 2 - Patches 1 to 40 (or 41 to 80) and look at the end of the file for "...Group U3.syx". Choose this to send to the Prophet 5/10. Again, there are copies for all of the User Banks, as there is no way to arrange them on the Synth itself.
3. Individual Patches SYSEX - This is self explanatory, these are all 80 Patches, saved separately, so you can audition them 1 at a time on the P5/10, then save it to your desired location.
  4. Sound Tower Editor - Sound Tower have an Editor For the Prophet 5/10 and I have supported their format. Duplicates are not required as you can send the Patches to where ever you want using the Librarian function.
  5. FX - There are 2 Folders with the Presets I have made for each of the Plugins. Unfortunately, they have different ways to install, though Blue Cat Audio's Chorus is the easiest on the Mac.
  6. The FX need to be placed in the Presets Folder of Blue Cat Audio, which can be

found (Mac) in "...iCloud/Documents/Blue Cat Audio/Blue Cat's Chorus 4/Stereo/"

7. Valhalla Supermassive requires you to find the Folder the “User Presets” are kept on the Computer and then to drag and drop them over from the Folder you downloaded. Please copy over the files, not the Folder.

On a MAC, they are in “...Library/Application Support/Valhalla DSP, LLC/ValhallaSupermassive/Presets/User/

For PC they are stored in “Program Data\Valhalla DSP, LLC\...”
