Prophecy Vol 3 – GEOSynths.

Thanks for purchasing Prophecy Vol 3 for the Sequential Prophet 5 & 10 Keyboards and Modules. I hope you enjoyed Vol 1 and 2, which has a great mix of Sounds from traditional, to more experimental. Vol 3 carries this on, however it makes full use of the additions in Firmware V2.0.6, which added the ability to change Velocity and Aftertouch settings per Patch.

You can get the Firmware by visiting the Sequential Forum (You need to Sign Up)
https://forum.sequential.com/index.php/topic,4873.0.html

As you know there are no FX on the Prophet 5/10 and the output is Mono and while that's fine, it does mean we have to try and find a solution to make it Stereo, Add Modulation FX and Time based FX such as Reverb or Delay. The FX are also used to balance out the Volume between Patches.

Blue Cat AudioChorus

Valhalla Supermassive for the Delay/Reverb (V2.0)
https://valhalladsp.com/shop/reverb/valhalla-supermassive

Both have downloads for Mac/PCPlease refer to their Instructions for install.

Firmware - IMPORTANT

Prophecy vol 3 was made after installing V2.0.6 so for full compatibility, you will need this installed.

InstallationBACK UP First!

I have created 80 Patches for the P5/10 and these are over 2 "Groups". The P5/10 doesn't use "Banks" as such, just 5 Groups of 40 Presets each, so you can thing of these "Groups" as mini Banks.

This time, I have created 2 Folders for "patches 1 to 40" and "Patches 41 to 80". Inside each you will find 5 Files, which are duplicate Sounds, however it allows you to send the Group (40 Patches) to any of the User Locations on the Prophet 5&10.

So, if you wanted to load Patches 1 to 40 into User Slot 3, you open the Folder and select the 3rd File, you can tell which one because at the end of the file name, you will see "…U-3.syx". If you wanted to load say Patches 41 to 80 into the 5th User Slot, you would open up the Folder "Patches 41 to 80 and select "U-5.syx". This way you can move sounds around without overwriting what you already have.

Individual Patches SYSEXThis is self explanatory, these are all 80 Patches, saved separately, so you can audition them 1 at a time on the P5/10, then save it to your desired location.
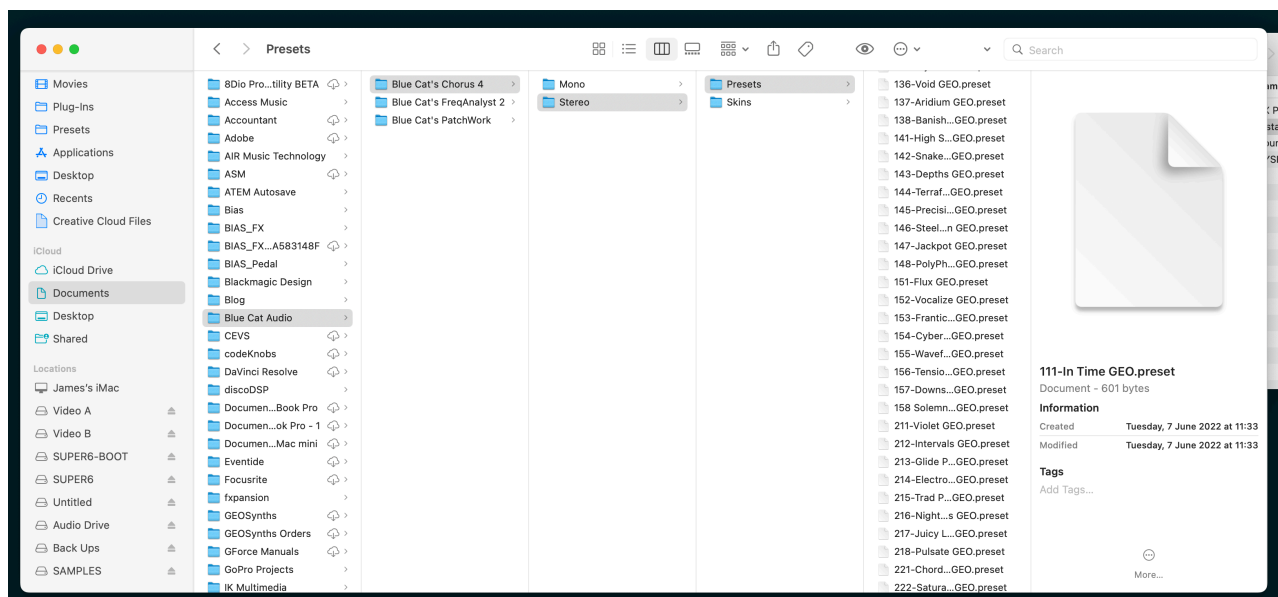

Observations.

Some Patches will sound different in terms of Volume as there is no way (I found) to change the Presets overall Volume, unless I messed with the Amp Envelope.

Sometimes the soft attack of a sound will get cut off and there might be a "click". I used the Triangle Wave mostly for the LFO as the other 2 shapes tend to cause clicks, but that's the same on the OB6 and Prophet 6.

FX

1. FXThere are 2 Folders with the Presets I have made for each of the Plugins. Unfortunately, they have different ways to install, though Blue Cat Audio's Chorus is the easiest on the Mac.

2. The FX need to be placed in the Presets Folder of Blue Cat Audio, which can be

found (Mac) in "…iCloud/Documents/Blue Cat Audio/Blue Cat's Chorus 4/Stereo/

3. Valhalla Supermassive requires you to find the Folder the "User Presets" are kept on the Computer and then to drag and drop them over from the Folder you downloaded. Please copy over the files, not the Folder.

   On a MAC, they are in "…Library/Application Support/Valhalla DSP, LLC/ValhallaSupermassive/Presets/User/

4. For PC they are stored in "Program Data\Valhalla DSP, LLC\…"
